# PROTECT THE NIGHT

Quality outdoor lighting products help to protect and restore the natural night environment by controlling and minimizing light pollution.

Atlas offers a lineup of outdoor lighting products that are DarkSky Approved. The DarkSky Approved program provides objective, third-party certification for lighting products, lighting designs, and installed lighting projects that minimize glare, reduce light trespass, and reduce light pollution.

## What is light pollution and why does it matter?

Light pollution is the change of outdoor light levels from those occurring naturally. When we over-light, fail to use timers and sensors, or use the wrong color of light, we can negatively affect many parts of our world, including migratory birds, pollinators, sea turtles, and mammals, including humans.

## To be DarkSky Approved, lighting products must be:

### Targeted

Restrict the amount of light that is directed upward.

### Glare Free

Avoid light patterns that create distracting glare and wasted light.

### Well Tuned

Light levels should be appropriate and not brighter than necessary.

### Controlled

Utilize dimming and other appropriate lighting controls.

### Warm Colored

Use warm color temperatures such as 3000K whenever possible.

## EAGLE SERIES AREA LIGHTS

These advanced fixtures offer unmatched performance and efficiency for a variety of applications. The external airflow fins and separate driver compartment reduce temperatures and extend fixture life.

- > Selectable versions available with up to 50K lumens
- > Smooth & Uniform Light
- > Advanced Rotatable Optics
- > Universal Bracket System makes installation easy

---

## SLIMPAK PRO

Features a slim, low-profile design with architectural styling. These fixtures feature an easy mounting system and are hinged at the bottom to prevent water ingress.

- > 1,200 - 8,100 Lumens
- > Hinged at the bottom to prevent water ingress
- > Quick and easy installation saves time and money
- > Smooth & Uniform Light

---

## WALL PAK PRO

High-performance, contemporary LED wall lights that feature a patented, labor-saving design that is quick and easy to install. The modern housing design dissipates heat to extend fixture life.

- > 1,600 - 7,000 Lumens
- > Quick and easy installation saves time and money
- > Smooth & Uniform Light
- > External fins increase surface area to dissipate more heat

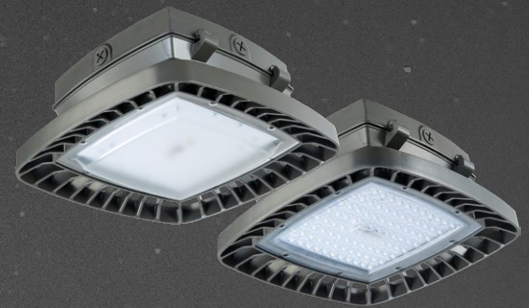

---

## LOW PROFILE CANOPY & GARAGE

The energy-efficient Low Profile Canopy and Parking Garage fixtures produce a smooth and uniform light pattern that eliminates glare. Installation is quick and easy – saving time and reducing labor costs.

- > 3,400 - 9,800 Lumens
- > Under 5" tall, perfect for a wide variety of applications
- > Hinged design makes installation quick and easy
- > Smooth & Uniform Light

---

## SELECTABLE BOLLARD

This heavy-duty bollard features aluminum construction that provides both corrosion and vandal resistance. It is ideal for lighting walkways and the exterior grounds of offices, apartments, hotels, and parks.

- > 1,300 - 3,500 Selectable Lumens
- > Solid construction withstands elements and poor conditions
- > Airtight LED head prevents fogging and condensation
- > Versatile and easy installation

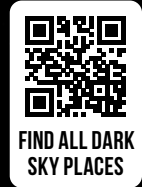

# DARK SKY PLACES

The location examples listed below require the use of quality outdoor lighting, effective policies to reduce light pollution, ongoing stewardship practices, and more. Scan the code to find even more Dark Sky Places.
